However, the calculations are representative of the highest concentration of organic ligands found to date in laboratory leaching studies. After the speciation calculations were completed, laboratory adsorption experiments were conducted. Both batch and column experiments were performed. The results and discussion of this work is presented in Section 5. Section 6 presents the conclusions of this project and recommendations and Section 7 lists the references cited. Two appendices are included, the first contains the thermodynamic data used to perform the speciation calculations discussed in Section 4 and the second contains the K values for the d organic ligands and metals as a function of pH for the batch adsorption tests shown in Section 5. 1. 3 This item ships from La Vergne,TN.
