Brand New Book ***** Print on Demand *****.Excerpt from The Extension Messenger, Vol. 9: College of Agriculture University of Illinois; Timely Notes for Farm Advisers and Others From the Agricultural College, Experiment Station, and Extension Service; January 13, 1926 Pullets that are forced for winter egg production will not produce as high a percentage of vigorous chicks as old hens that are not forced, according to D. C. Henderson, of the poultry division, College of Agriculture. Late molting hens, which are the best for breeding purposes, should be allowed to rest during the winter, because this is the period when they are renewing their feathers and rebuilding the fat and flesh which apparently are important in the production of hatching eggs. Heavy grain feeding is one of the best means of increasing the body weight of hens that are to be used as breeders. Mash should be kept before them at all times, even though the liberal grain feeding will tend to cut down the amount of mash that will be eaten. This will tend to keep the hens gaining in weight and put...

Reviews

Complete guideline! Its this type of great read through. it absolutely was writtern quite perfectly and helpful. I am very happy to explain how this is basically the best book i actually have read through during my personal life and can be he very best book for at any time.
