

# Technology Assessment: Cybersecurity for Critical Infrastructure Protection

---

By Government Accountability Office

CreateSpace Independent Publishing Platform. Paperback. Book Condition: New. This item is printed on demand. Paperback. 224 pages. Dimensions: 11.0in. x 8.5in. x 0.5in. Many cybersecurity technologies that can be used to protect critical infrastructures from cyber attack are currently available, while other technologies are still being researched and developed. These technologies, including access control technologies, system integrity technologies, cryptography, audit and monitoring tools, and configuration management and assurance technologies, can help to protect information that is being processed, stored, and transmitted in the networked computer systems that are prevalent in critical infrastructures. This item ships from La Vergne, TN. Paperback.
