WHAT WOULD HAPPEN IF A CREVICE SHOULD OPEN IN THE OCEANS BOTTOM (An exciting interview between the occult guest and his perplexed host.) Is it not natural to suppose that a mass of water like this great lake would overflow the barrier immediately, as soon as the surface reached the upper edge, for the pressure of the immense volume must be beyond calculation No, for it is height, not expanse, which, as hydrostatic engineers understand, governs the pressure of water. A liquid column, one foot in width, would press against the retaining dam with the force of a body of the same liquid, the same depth, one thousand miles in extent. Then the decrease of gravity here permits the molecular attraction of the waters molecules to exert itself more forcibly than would be the case on the surface of the earth, and this holds the liquid mass together more firmly. See, he observed, and dipping his finger into the water, he held it before him with a drop of water attached thereto (Figure 27), the globule being of considerable size, and Fiaz. lengthened as though it consisted of some glutinous liquid. How can a thin stratum of water give rise to a volcanic eruption I next queried. There seems to be no melted rock, no evidence of intense heat, either beneath or about us. I informed you some time ago that I would partially explain these facts. Know then, that the...
